Quelle	PARLAM 4 is a mouse monoclonal IgG1 antibody derived by fusion of Sp 2/0 Ag 14 Mouse myeloma cells with spleen cells from a BABL/c Mouse immunized with isolated Human CEA. The immunogen has been isolated from Human colonic carcinoma cells.
Anwendungsbeschreibung	PARLAM 4 is useful for flow cytometry, immunoblotting, immunocytochemistry on methanol fixed cells and immunohistochemistry on frozen tissues when using a PBS buffer containing 0.1 mM CaCl ₂ and 0.1 mM MgCl ₂ . The antibody is also reactive in formalin-fixed and paraffin-embedded tissue sections after treatment with citrate buffer pH 6.0 in an autoclave. Human colon carcinoma tissue is used as positive control. Optimal antibody dilution should be determined by titration, we recommend a 1:25 - 1:100 dilution for immunohistochemistry with avidin-biotinylated Horseradish peroxidase complex (ABC) as detection reagent, and 1:100 - 1:500 for immunoblotting application.
