| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | IHC-Fr, IHC-P, WB                                                                                                                                                                                                                                             |
| Spezies Reaktivität      | Bovine, Human, Rat                                                                                                                                                                                                                                            |
| Produktbeschreibung      | Cytokeratins are a subfamily of intermediate filament proteins and are characterized by a remarkable biochemical diversity, represented in Human epithelial tissues by at least 20 different polypeptides. They range in molecular weight between 40 kDa a... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [Ks13.1]                                                                                                                                                                                                                                                      |
| Isotyp                   | IgG1                                                                                                                                                                                                                                                          |
| UniProt                  | <a href="#">P13646</a>                                                                                                                                                                                                                                        |
| Puffer                   | Each vial contains 1ml of culture supernatant of monoclonal antibody containing 0.09% sodium azide.                                                                                                                                                           |

|                        |                                                                                                                                                                                                          |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Quelle                 | Ks13.1 is a Mouse monoclonal IgG1 antibody derived by fusion of SP2/0 Mouse myeloma cells with spleen cells from a BALB/c Mouse immunized with a Cytokeratin preparation extracted from Human esophagus. |
| Formel                 | Each vial contains 1ml of culture supernatant of monoclonal antibody containing 0.09% sodium azide.                                                                                                      |
| Anwendungsbeschreibung | Ks13.1 is suitable for immunoblotting and immunohistochemistry on frozen tissues and paraffin embedded tissue after protease pretreatment. Optimal antibody dilution should be determined by titration.  |
