| Hersteller               | NordicMubio                                                                                                                                                                                                                                                  |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                             |
| Applikation              | Blocking                                                                                                                                                                                                                                                     |
| Produktbeschreibung      | This peptide is the immunogen used to make Cat X2755P. Activates insulin, somatostatin, glucokinase, islet amyloid polypeptide and glucose transporter type 2 gene transcription. Particularly involved in glucose-dependent regulation of insulin gene t... |
| Konzentration            | See vial for concentration                                                                                                                                                                                                                                   |
| Puffer                   | Provided as solution in phosphate buffered saline with 0.08% sodium azide                                                                                                                                                                                    |
| Formel                   | Provided as solution in phosphate buffered saline with 0.08% sodium azide                                                                                                                                                                                    |
| Anwendungsbeschreibung   | Optimal concentration should be evaluated by serial dilutions.                                                                                                                                                                                               |
