Goat anti Human alpha and beta lipoproteins, Clone: [Polyclonal], Monoclonal NMB-GAHU/LP

Artikelname	Goat anti Human alpha and beta lipoproteins, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAHU/LP
Hersteller Artikelnummer	GAHu/Lp
Alternativnummer	NMB-GAHU/LP
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to lipoproteins. In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), using various antiserum concentrations against fresh normal human plasma three precipitin lines are obtained. No reactio...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added. Reconstitute the lyophilized an

Quelle	Lipoproteins form a heterogeneous system of protein-lipid-carbohydrate complexes which provides highly efficient transport of phospholipids, glycolipids, fatty acids, mono-, di- and triglycerides, cholesterol and cholesteroesters. Concentrations in norma
Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. Dilutions may be prepared by adding phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the antiserum. Diluted antiserum should be stored at +4C, not refrozen, and preferably used the same day.
