Product Datasheet

Goat anti Human C1r, Clone: [Polyclonal], Monoclonal NMB-GAHU/C1R

Artikelname	Goat anti Human C1r, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAHU/C1R
Hersteller Artikelnummer	GAHu/C1r
Alternativnummer	NMB-GAHU/C1R
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to C1r. In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), using various antiserum concentrations against fresh normal human plasma a single precipitin line is obtained which shows a react...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
UniProt	P00736
Puffer	Delipidated, heat inactivated, lyophilized, stable IgG fraction No preservative added. IgG protein concentration 11.8 mg/ml. No foreign proteins added. Reconstitute the lyophilized antiserum by adding 1 ml sterile distilled water.

Quelle	C1 component of human complement is a complex of three glycoproteins: C1q, C1r and C1s. C1r has a molecular weight of 83,000 and is present in plasma in an average concentration of 50 µg/ml, either as a complex with C1q and C1s or in the absence of C1q as
Formel	Delipidated, heat inactivated, lyophilized, stable IgG fraction No preservative added. IgG protein concentration 11.8 mg/ml. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. Dilutions may be prepared by adding phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the antiserum. Diluted antiserum should be stored at +4C, not refrozen, and preferably used the same day.
