Goat anti Human J chain of dimeric IgA, conjugated with Biotin, Clone: [Polyclonal], Monoclonal NMB-GAHU/J/BIO

Artikelname	Goat anti Human J chain of dimeric IgA, conjugated with Biotin, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAHU/J/BIO
Hersteller Artikelnummer	GAHu/J/Bio
Alternativnummer	NMB-GAHU/J/BIO
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Spezies Reaktivität	Human
Konjugation	Biotin
Format	IgG
Spezifität	IgA (J)
Minimale Kreuzreaktivität (MinX)	no cross-adsorbtion
Produktbeschreibung	In immunoelectrophoresis and radial immunodiffusion (Ouchterlony), this immunoconjugate shows a single precipitation reaction with totally reduced and alkylated polyclonal and monoclonal polymeric IgA, secretory IgA and IgM. A reaction of complete id...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]

Puffer	Biotin-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity.
Quelle	Human J chain is a polypeptide folded within the structure of the polymeric immunoglobulin, resulting in a very limited exposure of J chain antigenic determinants. The antiserum is raised against the isolated and purified J chain. J chains isolated from p
Formulierung	Biotin
Formel	Biotin-coupled purified hyperimmune IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2) No preservative added, as it may interfere with the antibody activity.
Antibody Type	Secondary Antibody
Anwendungsbeschreibung	ELISA,Immunocytochemistry,Immunohistochemistry (paraffin),Dot blot,Immunoblotting. The lyophilized conjugate is shipped at ambient temperature and may be stored at +4C, prolonged storage at or below -20C. It is reconstituted by adding 1 ml sterile distilled water, spun down to remove insoluble particles, divided into small aliquots, frozen and stored at or below -20C. Prior to use, an aliquot is thawed slowly at ambient temperature, spun down again and used to prepare working dilutions by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided.
