| Minimale Kreuzreaktivität (MinX) | Human                                                                                                                                                                                                                                                          |
| Produktbeschreibung              | The reactivity of the antiserum is directed to the subclass IgG2a. It reacts strongly with Ig2a of the allelic types Igh-1a and Igh-1b, which include BALB/C, C57BL, CBA/J, SJ/J and SM/J. When used for the identification of IgG2a in other mouse strains... |
| Klonalität                       | Monoclonal                                                                                                                                                                                                                                                     |
| Klon-Bezeichnung                 | [Polyclonal]                                                                                                                                                                                                                                                   |

|                        |                                                                                                                                                                                                                                                                  |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Puffer                 | TRITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. It is reconstituted by adding 1 ml sterile distilled water, spun down |
| Quelle                 | Pools of purified homogenous IgG2a isolated from mouse serum of strains belonging to the allelic types Igh-1a and Igh-1b. Freund's complete adjuvant is used in the first step of the immunization procedure.                                                    |
| Formulierung           | TRITC                                                                                                                                                                                                                                                            |
| Formel                 | TRITC-coupled purified hyperimmune goat IgG lyophilized from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity.                                                                       |
| Antibody Type          | Secondary Antibody                                                                                                                                                                                                                                               |
| Anwendungsbeschreibung | ELISA, Immunocytochemistry, Immunohistochemistry (frozen), (In)direct immunofluorescence.                                                                                                                                                                        |
