Goat anti Mouse major urinary protein, Clone: [Polyclonal], Monoclonal NMB-GAM/MUP

Artikelname	Goat anti Mouse major urinary protein, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-GAM/MUP
Hersteller Artikelnummer	GAM/MUP
Alternativnummer	NMB-GAM/MUP
Hersteller	NordicMubio
Wirt	Goat
Kategorie	Antikörper
Produktbeschreibung	The reactivity of the antiserum is restricted to mouse MUP. In immunoelectrophoresis and radial immunodiffusion, using various antiserum concentrations against normal mouse plasma characteristic precipitin lines are obtained which show a reaction of ...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added, as it may interfere with the antibody activity. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign
Quelle	The MUP is a sex related complex with a pre-albumin mobility in gel electrophoresis. Concentrations in male mice are between 50 to 150 µg/ml, in female mice 10 to 20 µg/ml. The complex is also detectable in serum, however concentrations are about 200 to 4

Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum No preservative added, as it may interfere with the antibody activity. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis use 2 µl urine, plasma or equivalent against 120 µl antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 µl antiserum in a 3 mm diameter centre well and 2 µl serum samples (neat and diluted) in 2 mm diameter peripheral wells.
