| Wirt                     | Rabbit                                                                                                                                                                                                                                                          |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                      |
| Produktbeschreibung      | The reagents were evaluated for potency, purity and specificity using most or all of the following techniques: immunoelectrophoresis, cross-immunoelectrophoresis, single radial immunodiffusion (Ouchterlony), block titration, ELISA, immunoblotting and...   |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                      |
| Klon-Bezeichnung         | [Polyclonal]                                                                                                                                                                                                                                                    |
| UniProt                  | <a href="#">Q2KJ64</a>                                                                                                                                                                                                                                          |
| Puffer                   | Purified hyperimmune rabbit IgG lyophilised from a solution in phosphate buffered saline (PBS, pH 7.2). No preservative added, as it may interfere with the antibody activity. No foreign protein added. It is reconstituted by adding 1.0 ml sterile distilled |
| Quelle                   | Arginase isolated and purified from calf liver. Freund's complete adjuvant is used in the first step of the immunization procedure.                                                                                                                             |

|                        |                                                                                                                                                                                                          |
