| Konjugation                      | Unconjugated                                                                                                                                                                                                                                                  |
| Format                           | IgG                                                                                                                                                                                                                                                           |
| Spezifität                       | IgM (H+L)                                                                                                                                                                                                                                                     |
| Minimale Kreuzreaktivität (MinX) | no cross-adsorbtion                                                                                                                                                                                                                                           |
| Produktbeschreibung              | The reactivity of the antiserum is directed to the Fc and Fab subunits of the IgM molecule. It includes a certain degree of reactivity with other immunoglobulins via the common Fab portion. It does not react with any non-Ig protein in goat serum, as ... |
| Klonalität                       | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung                 | [Polyclonal]                                                                                                                                                                                                                                                  |

|                        |                                                                                                                                                                                                                                                                 |
