Product Datasheet

Rabbit anti Human J chain of dimeric IgA, Clone: [Polyclonal], Monoclonal NMB-RAHU/J

Artikelname	Rabbit anti Human J chain of dimeric IgA, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-RAHU/J
Hersteller Artikelnummer	RAHu/J
Alternativnummer	NMB-RAHU/J
Hersteller	NordicMubio
Wirt	Rabbit
Kategorie	Antikörper
Spezies Reaktivität	Human
Konjugation	Unconjugated
Format	Antiserum
Spezifität	IgA (J)
Minimale Kreuzreaktivität (MinX)	no cross-adsorbtion
Produktbeschreibung	The reactivity of the antiserum is restricted to J chain as tested in immunoelectrophoresis and radial immunodiffusion. The antiserum shows a single precipitation reaction with totally reduced and alkylated polyclonal and monoclonal polymeric IgA and...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]

Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rabbit serum. No foreign proteins added. Reconstitute the lyophilized
Quelle	Human J chain is a polypeptide folded within the polymeric structure of the immunoglobulin. J chain isolated form human polymeric IgA and IgM are identical by criteria of composition, peptide maps and antigenicity. Human J chain has been established as di
Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rabbit serum. No foreign proteins added.
Antibody Type	Secondary Antibody
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis use 2 µl serum or equivalent against 120 µl antiserum. In double radial immunodiffusion use a rosette arrangement with 10 µl antiserum in 3 mm diameter centre well and 2 µl serum samples (neat and serially diluted) in 2 mm diameter peripheral wells.
