Rabbit anti Human milk proteins, Clone: [Polyclonal], Monoclonal NMB-RAHU/TM

Artikelname	Rabbit anti Human milk proteins, Clone: [Polyclonal], Monoclonal
Artikelnummer	NMB-RAHU/TM
Hersteller Artikelnummer	RAHu/TM
Alternativnummer	NMB-RAHU/TM
Hersteller	NordicMubio
Wirt	Rabbit
Kategorie	Antikörper
Produktbeschreibung	In immunoelectrophoresis against human milk precipitation of not less than 7 different proteins may be obtained. However the number of visible precipitin lines varies widely among individual specimens of human milk. The total concentration of protein...
Klonalität	Monoclonal
Klon-Bezeichnung	[Polyclonal]
Puffer	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rabbit serum. No foreign proteins added. Reconstitute the lyophilized
Quelle	Pooled whole human milk. Freund's complete adjuvant is used in the first step of the immunization procedure.

Formel	Delipidated, heat inactivated, lyophilized, stable whole antiserum. No preservative added. Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal rabbit serum. No foreign proteins added.
Anwendungsbeschreibung	Precipitation assays. In immunoelectrophoresis use 2 µl serum or equivalent against 120 µl antiserum. In double radial immunodiffusion (Ouchterlony) use a rosette arrangement with 10 µl antiserum in 3 mm diameter center well and 2 µl serum samples (neat and serially diluted in 2 mm diameter peripheral wells. Different bleedings of the immunized animals are pooled to obtain a broad spectrum balanced against the varying concentrations of the individual serum protein components.
