| Kategorie                        | Antikörper                                                                                                                                                                                                      |
| Spezies Reaktivität              | Mouse                                                                                                                                                                                                           |
| Konjugation                      | APC                                                                                                                                                                                                             |
| Format                           | F(ab') <sub>2</sub>                                                                                                                                                                                             |
| Spezifität                       | IgG (H+L)                                                                                                                                                                                                       |
| Minimale Kreuzreaktivität (MinX) | Human,Bovine,Equine,Rabbit,Porcine                                                                                                                                                                              |
| Klonalität                       | Polyclonal                                                                                                                                                                                                      |
| Isotyp                           | F(ab') <sub>2</sub> Fragment                                                                                                                                                                                    |
| Puffer                           | 0.01M Sodium Phosphate, 0.25M NaCl, pH 7.6                                                                                                                                                                      |
| Reinheit                         | The antibody was purified from antisera by a combination of pepsin digestion and immunoaffinity chromatography using antigens coupled to agarose beads. Fc fragments and whole IgG molecules have been removed. |

|                        |                                    |
|------------------------|------------------------------------|
| Formulierung           | F(ab') <sub>2</sub> Fragment       |
| Antibody Type          | Secondary Antibody                 |
| Application Verdünnung | 1:50 - 1:200 for most applications |
