| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                    |
| Applikation              | ELISA                                                                                                                                                                                                                                                          |
| Spezies Reaktivität      | All                                                                                                                                                                                                                                                            |
| Produktbeschreibung      | This is a colorimetric competitive immunoassay kit for the quantitative determination of extracellular cGMP. Sensitivity is increased by acetylation (reagents included). Absorbance is read at 405 nm. The ready-to-use liquid color-coded reagents provid... |
| Sensitivitaet            | (non-acetylated) 0.37 pmol/ml, (acetylated) 0.088 pmol/ml (range (non-acetylated) 0.16 - 500 pmol/ml, (acetylated) 0.16 - 100 pmol/ml)                                                                                                                         |
| Target-Kategorie         | cGMP                                                                                                                                                                                                                                                           |
| Anwendungsbeschreibung   | For the quantitative determination of cGMP in culture supernatants, plasma, serum, saliva, and urine from any species.                                                                                                                                         |
