| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Recombinant full-length human Integrin alpha IIb protein                                                                                                                                                                                                      |
| Konjugation              | Unconjugated                                                                                                                                                                                                                                                  |
| Produktbeschreibung      | The clone 962C1, a mouse monoclonal antibody, reacts with the human CD41 molecule, the integrin alpha-IIb also known as platelet GPIIb. CD41 is composed of two subunits GPIIbalpha (120 kDa) and GPIIbbeta (23 kDa) that interact with CD61 to form a fun... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
