| Immunogen                | C-terminal human ARF1 peptide SNQLRNQ                                                                                                                                                                                                                         |
| Produktbeschreibung      | The ADP-ribosylation factor (ARF) family comprises a group of structurally and functionally conserved proteins, which are members of the Ras superfamily of regulatory GTP-binding proteins. The ARF family is divided functionally into the ARF and the A... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [1A9/5]                                                                                                                                                                                                                                                       |
| Molekulargewicht         | 20kDa                                                                                                                                                                                                                                                         |
| Isotyp                   | IgG2a                                                                                                                                                                                                                                                         |

|                        |                                                                                                                                                                                                                                                               |
