| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Immunogen                | Human PBL s from a T-cell acute lymphoblastic leukemia (T-ALL) patient                                                                                                                                                                                        |
| Produktbeschreibung      | Recognizes a protein of 12kDa, identified as beta-microglobulin. Beta--microglobulin non-covalently associates with the 44kDa chain to form the HLA Class I antigen complex. Human beta-2 microglobulin associated with HLA Class I antigens is expressed ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [246-E9.E7, same as HLA.ABC.m2]                                                                                                                                                                                                                               |
| Molekulargewicht         | 12kDa                                                                                                                                                                                                                                                         |

|                        |                                                                                                                                                                        |
