| Spezies Reaktivität      | Human, Mouse, Rat                                                                                                                                                                                                                                             |
| Immunogen                | Recombinant protein corresponding to residues 1-181 of human WT1.                                                                                                                                                                                             |
| Produktbeschreibung      | Recognizes a 47-55kDa-tumor suppressor protein, identified as Wilms Tumor (WT1) protein. The antibody reacts with all isoforms of the full-length WT1 and also identifies WT1 lacking exon 2-encoded amino acids, frequently found in subsets of sporadic ... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [SPM361]                                                                                                                                                                                                                                                      |
| Molekulargewicht         | 47-55kDa                                                                                                                                                                                                                                                      |

|                        |                                                                                                                                                                                                                                                               |
