| Wirt                     | Mouse                                                                                                                                                                                  |
| Kategorie                | Antikörper                                                                                                                                                                             |
| Applikation              | ChIP, ELISA, IF, WB                                                                                                                                                                    |
| Spezies Reaktivität      | Human                                                                                                                                                                                  |
| Immunogen                | Anti-Pol II S2p Antibody was produced in mice by repeated immunization with the YSPTSPS repeat in the B1 subunit of RNA polymerase II phosphorylated at Ser2 of the repeated sequence. |
| Konjugation              | Unconjugated                                                                                                                                                                           |
| Klonalität               | Monoclonal                                                                                                                                                                             |
| Konzentration            | 1.0 µg/µl by UV absorbance at 280 nm                                                                                                                                                   |
| Isotyp                   | IgG1                                                                                                                                                                                   |
