| Artikelname              | Human MMP3 Protein (Recombinant) - LS-G137631                                                                                                                                                                  |
| Artikelnummer            | LS-G137631-10                                                                                                                                                                                                  |
| Hersteller Artikelnummer | LS-G137631-10                                                                                                                                                                                                  |
| Alternativnummer         | LS-G137631-10                                                                                                                                                                                                  |
| Hersteller               | LifeSpan Biosciences                                                                                                                                                                                           |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                               |
| Konzentration            | 0.2 mg/ml                                                                                                                                                                                                      |
| Molekulargewicht         | Predicted molecular mass of approximately 54 kD. The protein migrates at about 55 kD in DTT-reducing conditions and about 60 kD in non-reducing condition by SDS-PAGE. The N-terminal amino acid is Histidine. |
| NCBI                     | <a href="#">4314</a>                                                                                                                                                                                           |
| Quelle                   | Human                                                                                                                                                                                                          |
| Reinheit                 | Greater than 95% by SDS-PAGE                                                                                                                                                                                   |
| Formulierung             | 0.22 µm filtered protein solution in 25 mM Tris, pH 7.5, 5 mM CaCl <sub>2</sub> , 150 mM NaCl, 20% Glycerol                                                                                                    |
