| Immunogen                | Human brain tissue factor (CD142)                                                                                                                                                                                                                             |
| Konjugation              | APC                                                                                                                                                                                                                                                           |
| Produktbeschreibung      | CD142, also known as coagulation factor III, tissue thromboplastin, and tissue factor. It is a transmembrane glycoprotein, which enables cells to initiate the blood coagulation cascades, and functions as the high-affinity receptor for the coagulation... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| Klon-Bezeichnung         | [HTF-1]                                                                                                                                                                                                                                                       |
| Puffer                   | Stabilizing phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide                                                                                                                                                                                       |
| Target-Kategorie         | CD142                                                                                                                                                                                                                                                         |

Anwendungsbeschreibung

Flow cytometry: The reagent is designed for analysis of human blood cells using 10 µl reagent / 100 µl of whole blood or 10<sup>6</sup> cells in a suspension. The content of a vial (1 ml) is sufficient for 100 tests.
