Anwendungsbeschreibung	ELISA:Sandwich: To detect hFasL/Apo1L by sandwich ELISA (using 100 µL/well antibody solution) a concentration of 0.25 - 1.0 µg/mL of this antibody is required. This biotinylated polyclonal antibody, in conjunction with our Polyclonal Anti-Human FasL/Apo1L (XP-5130) as a capture antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hFasL/Apo1L. Western Blot:To detect hFasL/Apo1 by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 µg/mL. Used in conjunction with compatible secondary reagents the detection limit for recombinant hFasL/Apo1 is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.
