| Artikelname              | FGF-5 Antibody [19B640.1], Unconjugated, Mouse, Monoclonal                                                   |
| Artikelnummer            | PRS-XP-5719-M                                                                                                |
| Hersteller Artikelnummer | XP-5719-M                                                                                                    |
| Alternativnummer         | PRS-XP-5719-M-0.5                                                                                            |
| Hersteller               | ProSci                                                                                                       |
| Wirt                     | Mouse                                                                                                        |
| Kategorie                | Antikörper                                                                                                   |
| Applikation              | ELISA, NeA                                                                                                   |
| Spezies Reaktivität      | Human                                                                                                        |
| Immunogen                | The monoclonal antibody was produced in BALB/c mice using recombinant human FGF-5 as the immunizing antigen. |
| Konjugation              | Unconjugated                                                                                                 |
| Klonalität               | Monoclonal                                                                                                   |
| Konzentration            | batch dependent                                                                                              |
| Klon-Bezeichnung         | [19B640.1]                                                                                                   |
| NCBI                     | <a href="#">2250</a>                                                                                         |
| UniProt                  | <a href="#">P12034</a>                                                                                       |
| Formulierung             | Lyophilized                                                                                                  |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | Centrifuge vial prior to opening.                                                                                                                                                                                                                                                                                                                                                                            |
| Anwendungsbeschreibung | <p>Neutralization: To yield one-half maximal inhibition [ND50] of the biological activity of hFGF-5 (27.6 µg/mL), a concentration of 100 µg/mL of this antibody is required. ELISA: In a sandwich ELISA (assuming 100 µL/well), a concentration of 4.0-8.0 µg/mL of this antibody will detect at least 100 pg/mL of recombinant Human FGF-5 when used in conjunction with compatible secondary reagents.</p> |
