| Produktbeschreibung      | Recombinant Human Chymase (CMA1) is a purified Recombinant Protein. Purity: >90% as determined by SDS-PAGE. Host: E. coli. Endotoxin Level: Not Tested. Species: Human (Homo sapiens). Target Name: CMA1. Target Synonyms: Alpha-chymaseMast cell protease... |
| Molekulargewicht         | 29kDa                                                                                                                                                                                                                                                         |
| Tag                      | N-Terminal 6Xhis-Tagged                                                                                                                                                                                                                                       |
| Puffer                   | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                            |
| Reinheit                 | >90% by SDS-PAGE                                                                                                                                                                                                                                              |

|                  |                                                                                                                                                                                                                                                 |
