| Produktbeschreibung      | Recombinant E. coli Outer membrane porin C (ompC) is a purified Recombinant Protein. Purity: >85% as determined by SDS-PAGE. Host: E. coli. Endotoxin Level: Not Tested. Species: E. coli (strain K12). Target Name: ompC. Target Synonyms: Outer membrane... |
| Molekulargewicht         | 38.3kDa                                                                                                                                                                                                                                                       |
| Tag                      | Tag-Free                                                                                                                                                                                                                                                      |
| Puffer                   | If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.                            |
| Reinheit                 | >85% by SDS-PAGE                                                                                                                                                                                                                                              |

|                  |                                                                                                                                                                                                                                                                                 |
