## Product Datasheet

### Syrian Hamster IgG (isotype control), Clone: [ttko], Unconjugated, Monoclonal MBL-M189-3

|                          |                                                                               |
|--------------------------|-------------------------------------------------------------------------------|
| Artikelname              | Syrian Hamster IgG (isotype control), Clone: [ttko], Unconjugated, Monoclonal |
| Artikelnummer            | MBL-M189-3                                                                    |
| Hersteller Artikelnummer | M189-3                                                                        |
| Alternativnummer         | MBL-M189-3                                                                    |
| Hersteller               | MBL                                                                           |
| Wirt                     | Hamster                                                                       |
| Kategorie                | Antikörper                                                                    |
| Applikation              | FC, IP                                                                        |
| Konjugation              | Unconjugated                                                                  |
| Produktbeschreibung      | Hamster IgG (isotype control), Clone: [ttko], Monoclonal...                   |
| Klonalität               | Monoclonal                                                                    |
| Konzentration            | 1 mg/mL                                                                       |
| Klon-Bezeichnung         | [ttko]                                                                        |
| Isotyp                   | IgG                                                                           |
| Puffer                   | 1 mg/mL in PBS containing 50% glycerol                                        |
| Quelle                   | Purified IgG from hybridoma supernatant using protein A agarose.              |
| Target-Kategorie         | IgG                                                                           |

|                        |                                                                                                                                                                                                                                 |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | IP: This antibody can be used as a negative isotypic control. The concentration will depend on the conditions.. FCM: This antibody can be used as a negative isotypic control. The concentration will depend on the conditions. |
