## Product Datasheet

### Anti-Ribosomal P0/P1/P2 mAb, Clone: [9D5], Unconjugated, Mouse, Monoclonal MBL-RN004M

|                          |                                                                            |
|--------------------------|----------------------------------------------------------------------------|
| Artikelname              | Anti-Ribosomal P0/P1/P2 mAb, Clone: [9D5], Unconjugated, Mouse, Monoclonal |
| Artikelnummer            | MBL-RN004M                                                                 |
| Hersteller Artikelnummer | RN004M                                                                     |
| Alternativnummer         | MBL-RN004M                                                                 |
| Hersteller               | MBL                                                                        |
| Wirt                     | Mouse                                                                      |
| Kategorie                | Antikörper                                                                 |
| Applikation              | IP, WB                                                                     |
| Spezies Reaktivität      | Hamster, Human, Mouse, Rat                                                 |
| Konjugation              | Unconjugated                                                               |
| Produktbeschreibung      | Anti-Ribosomal P0/P1/P2 mAb, Clone: [9D5], Mouse, Monoclonal...            |
| Klonalität               | Monoclonal                                                                 |
| Konzentration            | 1 mg/mL                                                                    |
| Klon-Bezeichnung         | [9D5]                                                                      |
| NCBI                     | <a href="#">617</a>                                                        |
| Puffer                   | 1 mg/mL in PBS/50% glycerol, pH 7.2                                        |
| Quelle                   | Purified IgG from hybridoma supernatant                                    |

| Target-Kategorie       | P0/P1/P2                                                                                                                                                                                                                                                                        |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | WB: 0.5-1 µg/mL (chemiluminescence detection system). IP: 1 µg/200 µL of cell extract from 2.0 x 10 <sup>6</sup> cells/sample. RIP: 15 µg/500 µL of cell extract from 1.0 x 10 <sup>7</sup> cells/sample. Other: Inhibition test (Info. from the licenser. Not tested by MBLI.) |
