| Kategorie                | Sonstiges                                                                                                                                                                                                                                                                                                     |
| Applikation              | FISH                                                                                                                                                                                                                                                                                                          |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | Labeled FISH probes as chromosomal markers using Fluorescent In Situ Hybridization Technique. ( <a href="#">Technology</a> )....                                                                                                                                                                              |
| Application Verdünnung   | The probe is provided in 5x concentrated format, to allow mixing of up to 5 chromosome FISH probes in a single hybridization assay. When used alone, it should be diluted to 1x with FISH Hybridization Buffer ( <a href="http://www.abnova.com/products/">Cat &amp; href=http://www.abnova.com/products/</a> |
