| Applikation              | WB                                                                                                                                                                                                                                              |
| Spezies Reaktivität      | Human                                                                                                                                                                                                                                           |
| Produktbeschreibung      | Whole cell lysate (non-denatured)....                                                                                                                                                                                                           |
| Puffer                   | In modified RIPA Lysis Buffer.                                                                                                                                                                                                                  |
| Quelle                   | Peripheral Blood                                                                                                                                                                                                                                |
| Application Verdünnung   | Use it directly for immuno-precipitation, or heat lysate with SDS gel loading buffer to 95C for 5 minutes followed by rapid cooling for western blot application. If dissociating conditions are required, add reducing agent prior to heating. |
