## Product Datasheet

### **Lewis A monoclonal antibody, clone SPM279, Clone: [SPM279], Mouse, Monoclonal ABN-MAB13203**

|                          |                                                                               |
|--------------------------|-------------------------------------------------------------------------------|
| Artikelname              | Lewis A monoclonal antibody, clone SPM279, Clone: [SPM279], Mouse, Monoclonal |
| Artikelnummer            | ABN-MAB13203                                                                  |
| Hersteller Artikelnummer | MAB13203                                                                      |
| Alternativnummer         | ABN-MAB13203-100                                                              |
| Hersteller               | Abnova                                                                        |
| Wirt                     | Mouse                                                                         |
| Kategorie                | Antikörper                                                                    |
| Applikation              | FC, IF, IHC-P                                                                 |
| Spezies Reaktivität      | Human                                                                         |
| Immunogen                | Mucins isolated from ovarian cyst fluid.                                      |
| Produktbeschreibung      | Mouse monoclonal antibody raised against native human Lewis A....             |
| Klonalität               | Monoclonal                                                                    |
| Klon-Bezeichnung         | [SPM279]                                                                      |
| Puffer                   | In 10 mM PBS (0.05% BSA, 0.05% sodium azide).                                 |
| Formulierung             | Liquid                                                                        |

|                        |                                                                                                                                                                                                                                               |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | Flow Cytometry (0.5-1 ug/10 <sup>6</sup> cells in 0.1 mL)Immunofluorescence (0.5-1 ug/mL)Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections) (0.5-1 ug/mL)The optimal working dilution should be determined by the end user. |
