| Immunogen                | Synthesized peptide derived from human IGF2R (Phospho-Ser2484)                                                                                                                                                                                                |
| Produktbeschreibung      | This gene encodes a receptor for both insulin-like growth factor 2 and mannose 6-phosphate. The binding sites for each ligand are located on different segments of the protein. This receptor has various functions, including in the intracellular traffi... |
