| Spezies Reaktivität      | Drosophila, Human, Mouse, Rat                                                                                                                                                                                                                                 |
| Immunogen                | The antiserum was produced against synthesized peptide derived from human Histone H3.1 around the phosphorylation site of Ser10. AA range:1-50                                                                                                                |
| Produktbeschreibung      | Histones are basic nuclear proteins that are responsible for the nucleosome structure of the chromosomal fiber in eukaryotes. This structure consists of approximately 146 bp of DNA wrapped around a nucleosome, an octamer composed of pairs of each of ... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
