| Immunogen                | Synthesized phosho peptide around human IGF-I Receptor beta (Tyr1135)                                                                                                                                                                                         |
| Produktbeschreibung      | This receptor binds insulin-like growth factor with a high affinity. It has tyrosine kinase activity. The insulin-like growth factor I receptor plays a critical role in transformation events. Cleavage of the precursor generates alpha and beta subunit... |
| Klonalität               | Polyclonal                                                                                                                                                                                                                                                    |
