| Immunogen                | Synthesized peptide derived from human XPA (Phospho-Ser196)                                                                                                                                                                                                  |
| Produktbeschreibung      | This gene encodes a zinc finger protein involved in DNA excision repair. The encoded protein is part of the NER (nucleotide excision repair) complex which is responsible for repair of UV radiation-induced photoproducts and DNA adducts induced by che... |
