| Immunogen                | Synthesized peptide derived from human TRF2 (Phospho-Ser365)                                                                                                                                                                                                  |
| Produktbeschreibung      | This gene encodes a telomere specific protein, TERF2, which is a component of the telomere nucleoprotein complex. This protein is present at telomeres in metaphase of the cell cycle, is a second negative regulator of telomere length and plays a key r... |
