| Immunogen                | Synthesized peptide derived from human ITK AA range: 450-530                                                                                                                                                                                                  |
| Produktbeschreibung      | This gene encodes an intracellular tyrosine kinase expressed in T-cells. The protein contains both SH2 and SH3 domains which are often found in intracellular kinases. It is thought to play a role in T-cell proliferation and differentiation. [provided... |
