| Immunogen                | The antiserum was produced against synthesized peptide derived from C-terminal human ARHGEF2. AA range:851-900                                                                                                                                                |
| Produktbeschreibung      | Rho GTPases play a fundamental role in numerous cellular processes that are initiated by extracellular stimuli that work through G protein coupled receptors. The encoded protein may form complex with G proteins and stimulate rho-dependent signals. Al... |
