| Immunogen                | Synthesized peptide derived from human protein . at AA range: 400-480                                                                                                                                                                                         |
| Produktbeschreibung      | The protein encoded by this gene belongs to the cyclin family. Through its interaction with several proteins, such as RNA polymerase II, splicing factors, and cyclin-dependent kinases, this protein functions as a regulator of the pre-mRNA splicing pr... |
