| Konjugation              | AbFluor 488                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | The protein encoded by this gene is a cyclosporine-binding protein and is mainly located within the endoplasmic reticulum. It is associated with the secretory pathway and released in biological fluids. This protein can bind to cells derived from T- a... |
| Klonalität               | Monoclonal                                                                                                                                                                                                                                                    |
| UniProt                  | <a href="#">P23284</a>                                                                                                                                                                                                                                        |
| Quelle                   | Monoclonal, Mouse IgG                                                                                                                                                                                                                                         |

|                        |                                                                                                                                                            |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reinheit               | The antibody was affinity-purified from mouse ascites by affinity-chromatography using specific immunogen.                                                 |
| Formulierung           | Liquid in PBS, pH 7.4, containing 0.02% sodium azide as preservative and 50% Glycerol.                                                                     |
| Application Verdünnung | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: IHC 1:50-300, IF 1:50-200. |
