| Hersteller               | Assay Biotechnology                                                                                                                                                                                                                                           |
| Wirt                     | Goat                                                                                                                                                                                                                                                          |
| Kategorie                | Antikörper                                                                                                                                                                                                                                                    |
| Applikation              | FC, IF                                                                                                                                                                                                                                                        |
| Spezies Reaktivität      | Rabbit                                                                                                                                                                                                                                                        |
| Konjugation              | DyLight 488                                                                                                                                                                                                                                                   |
| Produktbeschreibung      | Assay Biotechnology secondary antibodies are available conjugated to enzyme, biotin or fluorophore for use in a variety of antibody-based applications including Western Blot, ImmunoHistoChemistry, ImmunoFluorescence, Flow Cytometry and ELISA. We offe... |
| Quelle                   | Goat                                                                                                                                                                                                                                                          |
| Reinheit                 | Affinity purified using solid phase Rabbit IgG (H&L) with finally > 95% purity based on SDS-PAGE                                                                                                                                                              |
| Formulierung             | Liquid in PBS, pH 7.4, containing 0.02% Sodium Azide as preservative, 1% BSA as stablizer and 50% Glycerol.                                                                                                                                                   |

|                        |                                                                                                                                                                |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Application Verdünnung | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting 1:50-1:1000 dilutions for most fluorescent applications. |
