| Immunogen                | Synthesized peptide derived from human ERK 2 AA range: 150-250                                                                                                                                                                                                |
| Produktbeschreibung      | This gene encodes a member of the MAP kinase family. MAP kinases, also known as extracellular signal-regulated kinases (ERKs), act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such... |
