### Hepatitis C Virus (HCV) Core Protein, Mouse ANO-MO-I40015B

|                          |                                                                            |
|--------------------------|----------------------------------------------------------------------------|
| Artikelname              | Hepatitis C Virus (HCV) Core Protein, Mouse                                |
| Artikelnummer            | ANO-MO-I40015B                                                             |
| Hersteller Artikelnummer | MO-I40015B                                                                 |
| Alternativnummer         | ANO-MO-I40015B-0.5MG,ANO-MO-I40015B-0.1MG                                  |
| Hersteller               | Anogen-Yes Biotech Laboratories                                            |
| Wirt                     | Mouse                                                                      |
| Kategorie                | Proteine/Peptide                                                           |
| Applikation              | EIA, IF, WB                                                                |
| Spezies Reaktivität      | Human                                                                      |
| Immunogen                | Synthetic peptides derived from HCV core protein                           |
| Produktbeschreibung      | Mouse monoclonal antibody to human hepatitis C virus (HCV) core protein... |
| Klonalität               | Monoclonal                                                                 |
| Klon-Bezeichnung         | B2                                                                         |
| Isotyp                   | IgG1,k                                                                     |
| Reinheit                 | Protein G affinity purified                                                |
| Formulierung             | Aff. pur.                                                                  |
| Lagerung                 | Store at -20°C                                                             |

|                        |                                                                                                                                                                                                                                                                 |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target-Kategorie       | Human hepatitis C virus (HCV) core protein                                                                                                                                                                                                                      |
| Application Verdünnung | Double distilled water is recommended to adjust the final concentration to 1.00mg/mL.                                                                                                                                                                           |
| Anwendungsbeschreibung | ELISA: The mAb reacts with human hepatitis C virus core protein, and doesn't react with HCV non-structure protein. Western Blot: The mAb, when used at concentration of 0.1-0.5µg/mL, will allow visualization of 0.1µg/lane of recombinant core protein C +... |
