| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                                              |
| Produktbeschreibung      | CD320 antigen is also known as 8D6 antigen,FDC-signaling molecule 8D6,Transcobalamin receptor and 8D6A. It is a single-pass type I membrane protein and containing two LDL-receptor class A domains. CD320 has been recently discovered and reported as a ...                      |
| Molekulargewicht         | 21.1 KDa                                                                                                                                                                                                                                                                           |
| NCBI                     | <a href="#">9</a>                                                                                                                                                                                                                                                                  |
| Reinheit                 | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                                                                                |
| Anwendungsbeschreibung   | Always centrifuge tubes before opening.Do not mix by vortex or pipetting.It is not recommended to reconstitute to a concentration less than 100µg/ml.Dissolve the lyophilized protein in distilled water.Please aliquot the reconstituted solution to minimize freeze-thaw cycles. |
