| Spezies Reaktivität      | Human                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | Alpha-N-Acetylgalactosaminide alpha-2,6-Sialyltransferase 2 (ST6GALNAC2) belongs to the glycosyltransferase 29 family that adds sialic acids to the non-reducing ends of glycoconjugates. At the cell surface, these modifications play roles in cell-cell... |
| Molekulargewicht         | 38.84 KDa                                                                                                                                                                                                                                                     |
| NCBI                     | <a href="#">9</a>                                                                                                                                                                                                                                             |
| Reinheit                 | Greater than 95% as determined by reducing SDS-PAGE                                                                                                                                                                                                           |
