| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | CD8A is an important immune glycoprotein that acts as a coreceptor for class I MHC:peptide complexes, linking T cells to antigens presented by APCs. It interacts with TCR and MHC class I, recruits LCK kinase, and initiates multiple signaling pathways... |
| Molekulargewicht         | Approximately 32-38 kDa (CD8 beta) & 42-50 (CD8 alpha) kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                            |
| Reinheit                 | 95                                                                                                                                                                                                                                                            |
| Formel                   | 12525&12526(Gene_ID)P01731 (K28-Y196)&P10300 (L22-T175)(Accession)                                                                                                                                                                                            |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
