| Hersteller               | MedchemExpress                                                                                                                                                                                                                                               |
| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                             |
| Produktbeschreibung      | The insulin R/CD220 protein is a receptor tyrosine kinase that coordinates insulin action by phosphorylating substrates such as IRS and SHC upon insulin binding. Phosphorylated IRS activates PI3K-AKT/PKB to exert metabolic effects, and activates Ras... |
| Molekulargewicht         | Approximately 107 kDa.                                                                                                                                                                                                                                       |
| Reinheit                 | 95                                                                                                                                                                                                                                                           |
| Formel                   | 3643(Gene_ID)P06213-1 (H28-K956)(Accession)                                                                                                                                                                                                                  |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                       |
