| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                              |
| Produktbeschreibung      | The TMEM106B protein is a key player in neurons involved in trafficking to late endosomes/lysosomes and potentially affects dendritic morphogenesis and maintenance by regulating lysosomal trafficking. It may act as a molecular brake on retrograde tra... |
| Molekulargewicht         | Approximately 65-68 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                                               |
| Reinheit                 | 95.00                                                                                                                                                                                                                                                         |
| Formel                   | 71900(Gene_ID)Q80X71 (P119-Q275)(Accession)                                                                                                                                                                                                                   |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                        |
