| Kategorie                | Proteine/Peptide                                                                                                                                                                                                                                               |
| Produktbeschreibung      | HLA-A*1101as is a key MHC I molecule that presents viral and tumor-derived peptides that direct T cell immune responses against infected or transformed cells. It collaborates with B2M to showcase a diverse peptide library. HLA-A*1101 KRAS G12S Complex... |
| Molekulargewicht         | Approximately 53-63 kDa, based on SDS-PAGE under reducing conditions, due to the glycosylation.                                                                                                                                                                |
| Formel                   | 3105&567(Gene_ID)AAV53343.1 (G25-T305)&P61769 (I21-M119)&VVVGASGVGK(Accession)                                                                                                                                                                                 |
| Anwendungsbeschreibung   | MCE Product type: Recombinant Proteins                                                                                                                                                                                                                         |
