| Kategorie                | Kits/Assays                                                                                                                                                                                                                                                   |
| Spezies Reaktivität      | Mouse                                                                                                                                                                                                                                                         |
| Produktbeschreibung      | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Mouse GnRH. During the reaction, Mouse GnRH in the sample or standard competes with a fixed amount of Mouse GnRH on the solid pha... |
| Detektionsbereich        | 12.35-1000pg/mL                                                                                                                                                                                                                                               |
| Sensitivitaet            | 4.64pg/mL                                                                                                                                                                                                                                                     |
| Proben                   | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target-Kategorie         | GnRH                                                                                                                                                                                                                                                          |
