| Expression System        | HEK293 Cells                                                                                                                                                                                                         |
| Reinheit                 | > 98 % as determined by reducing SDS-PAGE.                                                                                                                                                                           |
| Formulierung             | Lyophilized from sterile PBS, pH 7.4. Normally 5% - 8% trehalose, mannitol and 0.01% Tween 80 are added as protectants before lyophilization. Please refer to the specific buffer information in the printed manual. |
| Sequenz                  | Gln 28-Cys 232                                                                                                                                                                                                       |
